

WATCHGUARD ENDPOINT SECURITY

The Intelligence You Need To Stay Ahead Of Cyberattacks

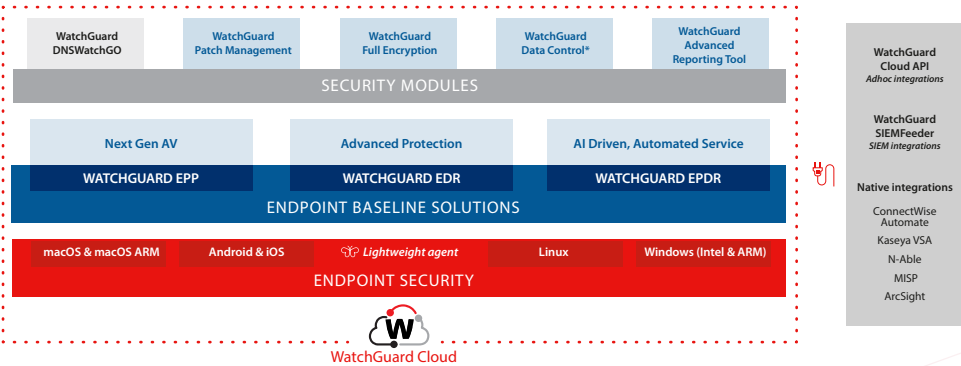

Extended security IT operations and visibility

Today's threat landscape is highly sophisticated and the volume of new viruses unprecedented. To combat this new reality, it takes the right resources and technology, and the ability to manage both. And while advanced threats keep appearing at alarming numbers, there is a shortage of IT professionals and IT budget to protect against them. Reinforcing your security posture is not a snap. Make it easier with WatchGuard Endpoint Security.

How does WatchGuard help you to address this challenge?

WatchGuard Endpoint Security solutions deliver the technologies required to stop advanced cyberattacks on endpoints including next-gen antivirus protection (EPP), Endpoint Detection and Response (EDR), and DNS filtering solutions. Add to them a full stack of integrated modules for patch management, sensitive data protection, encryption of disks and USB drives, and security intelligence insights, delivered via a single lightweight agent and managed from a single Cloud-based platform.

Add Modules to Extend your Endpoint Security

WatchGuard Patch Management

Keep operating systems and programs secure and up to date. Simplify patching to reduce your network's attack surface. Discover, prioritize, and deploy critical Windows operating systems and hundreds of third-party applications patches to prevent cyberattacks and mitigate known vulnerabilities with WatchGuard Patch Management.

WatchGuard Full Encryption

Full disk encryption is the first line of defense to protect your data effectively. WatchGuard Full Encryption leverages Microsoft BitLocker to encrypt and decrypt disks and enables organizations with pre-boot authentication, which ensures the user's identity before the operating system loads, preventing laptops from loss, theft, and unauthorized access to data.

WatchGuard Advanced Reporting Tool

Security professionals are overwhelmed with the large volumes of data handled. WatchGuard Advanced Reporting Tool provides high-grade visibility that helps IT teams build dashboards with contextual information to quickly spot problems, speed response rates, and get conclusions about IT operations and security intelligence collected.

WatchGuard Data Control*

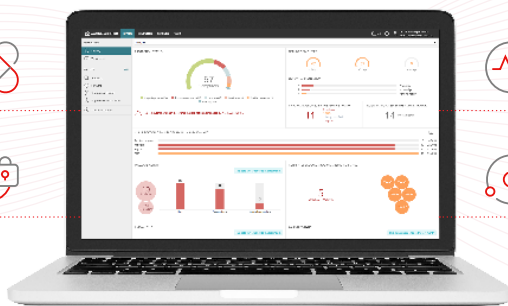

WatchGuard Data Control* simplifies the management of personal and sensitive data protection and provides needed visibility to where this is at all times. Enables companies to discover, classify, audit, and monitor unstructured personal data on endpoints, and helps users to properly handle data – for consent, notice, and regulatory obligations like GDPR.

*Available in Spain, Germany, UK, Sweden, France, Italy, Portugal, Netherlands, Finland, Denmark, Switzerland, Norway, Austria, Belgium, Hungary, and Ireland.
